Will the app have a user feed?
Yes, the app will include a feed for the user to type in.

How will the app calculate the occupancy of the locations accurately?
The program in the app will be able to calculate what the user share on the platform of the occupancy on a scale 1 -10.

Will the app calculate the occupancy of Strom and Blatt?
Yes, the program can calculate the occupancy of both gyms.

Can the app calculate the occupancy of each section of the gym's such as pool, court, etc...?
Not yet, the primary focus is on the gyms itself.

Does the app include the seating available in the library?
No, but the app will include a feature of the occupancy of the seating within the library.

Is the app strictly calculating the Occupancy of the library.
Yes and No, the seating occupancy within the library is also available.

How will I know that my account info is safe?
The program will only use info that is public already like name, school email, etc..

How can I make sure my account is Private?
The app will include a anonymous feature if you don't want your name and email displayed.

Is the UI simple to use?
Yes, I want the UI to be as simple as possible.

Will the UI include a tap to share?
Yes, tap to share will be included.

Will the app only display the current occupancy or will it have approximate occupancy for different times as well?
It will include the approximate occupancy for different times as well not just current.

Is the app available on all platforms?
current focus is on mobile devices only.

Can the app track the occupancy of PT classes taken at the gym's?
No, the app can only calculate the occupancy of the gym itself.

Will the app be able to display what machines are available in the weightroom?
No, although not a bad idea the focus is the gyms itself

Will the app include what rooms available in the library?
No, only the occupancy of the library and the seating within the library.

does the app let you know what users are currently in the library.
Yes, only works if the user has their location of while the app is or not in use.

Can I still use the app without accepting cookies?
Yes, the app will still work if you do not accept cookies.

Will I have the option to not allow the app to track my data using the app.
Yes, when the app is opened on your device you will have the option to press yes or no to allow tracking your data on the app.

Will the UI have a settings button
Yes, the settings icon will be added into the app.

Does the UI a multiple tabs like profile, friends , etc...?
